

Dolphin tour + Jozani Forest Tour W/Lunch – Half Day:

(Description)

The drive from town to Kizimkazi a small village at the Southern point of the island takes one hour. The surface of the Kizimkazi channel is broken by the skimming arcs of wild bottle-nosed dolphins, here you are taken by boat powered by an outboard engine into the sea to see the dolphins and if lucky will be able to swim quite close to them as they are very friendly and playful.

Snorkelling will also be part of this tour (snorkeling equipment can be hired at the site). Kizimkazi is also the site of a 12th Century Mosque, the earliest evidence of Islam in East Africa. The return trip includes a visit of this Mosque which still contains the famous Kufic scripts in its walls.

Later, we will proceed with Jozani Forest tour; Jozani Forest lies 35kms South-East of Zanzibar Town with an area of about 1,000 hectares, it is the only remaining natural forest on Unguja island where long ago you could find leopards and antelopes. At present it is the habitat for the Red Colobus Monkeys (*Colobus badius kirkii*) and the Blue Sykes Monkey. The Red Colobus monkey is one of the most endangered and rarest species on the planet.

The Red Colobus monkeys that are found in this Forest are very friendly and love to be photographed and can be viewed at close quarters by the help of your guide.

Other interesting features in this forest include the coastal evergreen bushland, mangroove forest, saline grassland and ground water forest, though these may require longer walks to reach.

After the tour we will return to Stone town at 6Degrees Restaurant for the Buffett Lunch and soft drinks.

Note:

***Dolphins at Kizimkazi are wild but there is an 85% of seeing the dolphins.**

*Remember to take your towel, shorts and swim wear when you take this tour. You will have to wade in the water to get into the wooden boat.

QUOTATION
